

**Weha
Granite
Fabrication
Shop Cart
2000 lb Capacity
#1901**

The Weha Granite and Stone Drywall Fabrication Shop Cart is a great cart for moving stone around the shop or on the job site. This isn't your cheap drywall cart. This granite cart was designed by fabricators for shop use. The Weha Granite Fabrication Shop Cart has features already built in that fabricators have to "modify" themselves in order to make it granite and stone worthy.

1) 2000 lbs weight capacity: Other "drywall carts" may say 2000lb capacity but just look at their little flimsy wheels. Not the Weha Granite Shop Cart. We put cast iron with phenolic resin wheels under this bad boy. 2 fixed, 2 swivel wheels that can carry 2000 lbs without any worry.

2) Rubber Base Mat: Each Weha Fab Shop Cart comes with a 41" x 15" x 1/4" thick protective rubber mat that covers the base of the cart. This mat is better than carpet as it doesn't collect stone, easily sprays off, reversible for both side use, and keeps the stone from sliding on the cart.

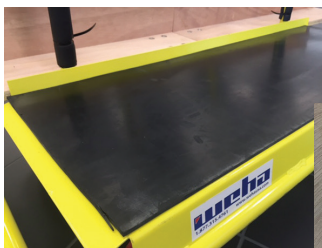

3) Protective Upright Foam: All 3 sides of the cart frame is protected with preinstalled foam. This helps protect the stone from scratches, and sliding on the cart.

4) Backsplash Cradle: The Weha Fab Shop Cart comes with a 71" x 4 1/4" usable space backsplash cradle. built to hold up to 8" tall backsplashes, this Backsplash cradle keeps the counter top and backsplash together throughout the entire production process.

2 swivel wheels with locks and 2 fixed wheels. 8" x 2" hard rubber wheels rated for 500 lbs each.

Dimensions:

- Overall Length: 49"
- Overall Height: 48"
- Overall Depth: 23"
- Surface Deck: 12" x 44"
