

**Weha Radial Arm
Finger Bit Tip
for granite, marble,
quartz, quartzite,
engineered stone
counter top sink and
vanity bowls
#30515**

Weha Radial Arm Finger Bit Tip is a high performing diamond tip for cutting out granite sinks, marble vanity bowls, quartz bowls, and other granite and stone hole applications with radial arm machines.

With fast cutting speed, the Weha Finger Bit Tip will cut up to 15 bowls while leaving the bowl ready for polishing pad use. Try Weha 3 Step Trilogy Pads for a great result.

The Weha Radial Arm Finger Bit Tip is made for all Radial Arm Machines such as Thibault, Wizard, Fabking, Scorpion, and other radial arm machines.

This incremental cutting finger bit is designed to follow the sink or vanity bowl template and work around the template on the stone to grind down the granite sink or vanity bowl. This will leave the stone perfectly straight and ready for profiling and polishing.

- 20mm x 20mm x 12 thread
- Designed for radial arm machines
- Cutting bowls
- Used with a 1/2 Gas Adapter
