

WH185 5" High Speed Air Grinder & Cutter with Water Feed 11,000 RPM

The Weha WH185 5" High Speed Air Grinder and Cutter is a front exhaust air grinder and air cutter that is made to endure the tough environments of a granite fabrication shop.

The WH185 accepts up to a 5" blade, 5" contour blade, diamond cupwheels, zero tolerance wheels, etc.

The external water feed supplies water to both sides of the blade, diamond cup wheel, etc to keep plenty of water on the material. The WH185 also comes with center water feed through the spindle for zero tolerance wheels, and other center water feed attachments. The Weha WH185 can also be run without water as well.

The Weha WH185 comes with a paddle trigger to have complete control over the air cutter at all times. Also the WH185 has a solid handle to keep cutting and grinding easy with less fatigue.

The WH185 Air Cutter is made to work with a 5" blade to cut granite, marble, quartz, quartzite, stone materials.

The great thing is that it uses less air than other air grinders. It only requires 9.8 cfm at 90 PSI.

Specifications:

- Length: 18.5"
- Weight: 4.5
- Max Blade: 5"
- Max RPM: 11,000
- Operating Pressure: 90 PSI
- Air Consumption: 9.8CFM
- Spindle Thread: 5/8-11
- Water: 2 External and 1 Internal

10, 90, 90+ warranty: 10 day Replaces the tool, 90 day Warranty repair, 90+ days repaired at cost
