

Everything for the Stone Industry

**4" and 5" x 5/8" Thick Yellow Foam Velcro Flexible Back Up Pad for Silicon Carbide Sandpaper**

Weha 5/8" thick x 5/8-11 Thread Yellow Foam Velcro Flexible Back Up Pads are made to be used with Velcro backed silicon carbide sandpaper. The 5/8" Thick yellow foam gives plenty of cushion for the sandpaper to roll over the edges and inside bowls, etc when sanding. The Yellow Foam Velcro Flexible Backer Pad can be compared to the Diskit flexible back up pads in quality and in performance.

- 5/8-11 brass thread
- Center water hole for wet use.
- The Yellow Foam Velcro Flexible Back Up Pad can be used wet or dry.

Part #	Description
4440	4" x 5/8" Thick Yellow Foam Back Up Pads
4441	5" x 5/8" Thick Yellow Foam Back Up Pads

**Weha 4" x 2" Silicon Carbide Cup Wheels and Drums for use with Marble, Onyx, Travertine, Limestone, Granite, and all Natural Stones. Wet and Dry Use**

Weha Silicon Carbide stones are excellent for shaping and grinding stone such as granite, marble, limestone, travertines, and all natural stones. All of the Weha Silicon Carbide Cup Wheels are the Green type Hybrid Cup Wheels. That means they can be used wet or dry. Weha Silicon Carbide Stones come in a variety of grits for grinding, shaping, removing scratches out of stone, truing up vertical edges, and even polishing stone with the higher grits. All of the Weha Silicon Carbide drums come with 5/8-11 threaded arbor to mount on angle grinders or radial arm machines

Weha 4" x 2" Silicon Carbide Cup Wheel Stones were made for face grinding. That makes these 4x2 Silicon Carbide Drums perfect for grinding marble and granite counter tops to create the perfect profile. The lower grits allow stock removal at a controlled rate

to create the exact profile needed. Also they are outstanding for smoothing and polishing.
