

LM30 - VE

Grinding-polishing machine for marble, terrazzo, concrete (and similar) floors. Suitable for granite and hard stones as well, only using special diamond abrasives.

- Sturdy and compact structure.
- Three-phase motor driven by frequency inverter thus improving machine output.
- Selection of four different speeds to optimize working of the floor.
- Available with "Prismatic", "Frankfurt" or "Comma" type abrasive holding plate.
- Machine level adjustment by eccentric wheel axis.
- Transport handle and pivoting wheel facilitate machine movements.

A FRANKFURT
B CASSANI
C VIRGOLA

BALLAST (Optional)

Power	2.2 kW
Voltage	230 V single-phase
Motor rpm	1400
Abrasive holding plate ø	300 mm
Plate RPM and peripheral speed	I - 351 rpm - 330 m/min. II - 439 rpm - 413 m/min. III - 527 rpm - 496 m/min. IV - 614 rpm - 578 m/min.
Water tank capacity	26 l
Size	500x995x1300 mm
Dimensions of palletized carton	520x1010x1000 mm
Net weight without accessories	100 kg
Gross weight	120 kg

ACCESSORIES PROVIDED

Abrasive holding plate
Shock-absorbing spring (inner type)
Plastic splashguard ring
Squeegee
Set of servicing wrenches
